

CYBER SAFETY

STAY SAFE & HAVE FUN ON THE INTERNET

Privacy

Set your profile to **'private'** so your personal information is kept secret.

Always keep your password a **secret**.

Safety

Ask someone you trust about good internet sites to visit and a safe search engine to use. Browsing is a great way to find information, but you may not end up where you planned.

Be careful who you trust online. Making new friends can be fun but there is a chance that they may not be who they say they are.

Think before you post information online - once posted it is difficult to remove.

Nothing is so awful that, you can't talk with someone about it.

Scams

Do not accept any offers that seem too good to be true - they probably are.

Identity Theft

Think about why you would need to give your name, address or any personal details to anyone before you do it.

Public Café's

When using any public Internet Café, or shared computer kiosk, do not do any internet banking & clear the cookies/ history menu when you finish.

Computer Viruses

Do not open messages or attachments or links forwarded from people that you do not know. They could contain viruses and malicious software, or be trying to sell you something.
