

Bundaberg Regional Council Water Education

The Underground Adventure Colouring Book

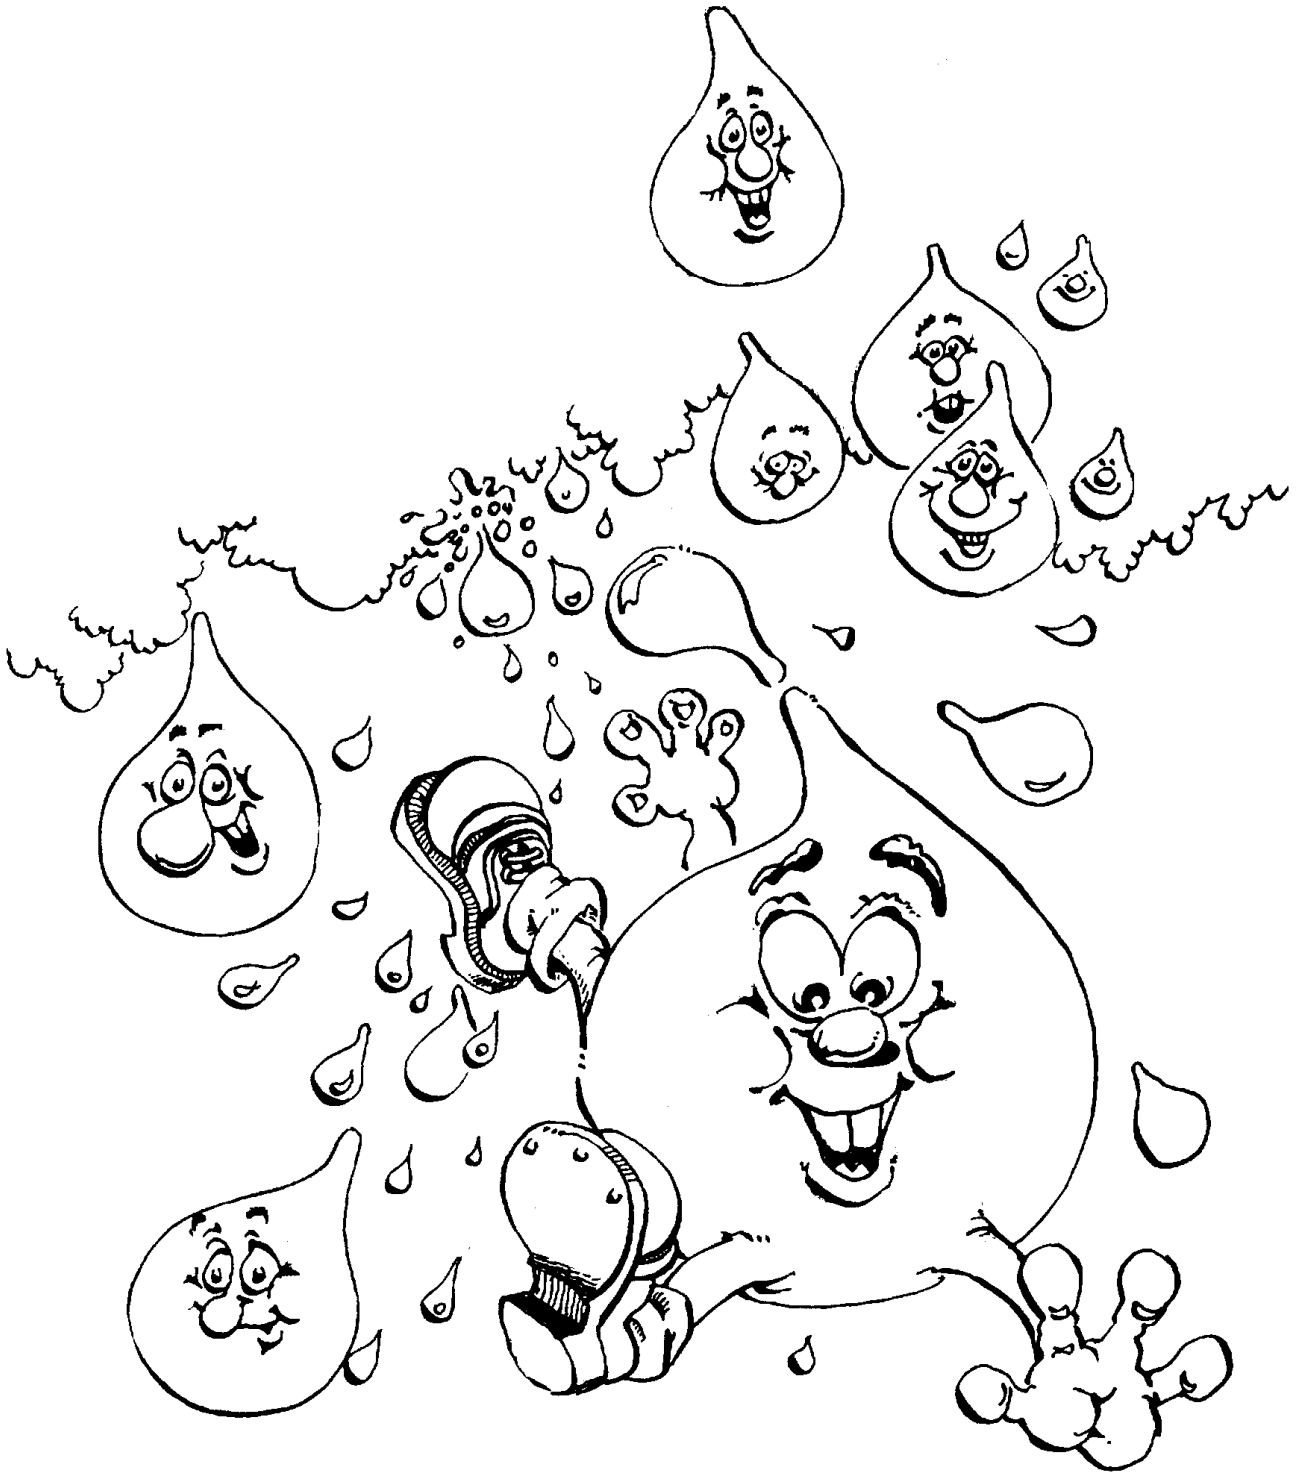

Whizzy the waterdrop was sitting high up in a cloud.

It was very cold up there and Whizzy's cloud started getting **BIGGER** and **BIGGER** and **BIGGER**. It started getting **HEAVIER** and **HEAVIER** and **HEAVIER**. Can you guess what happened next?

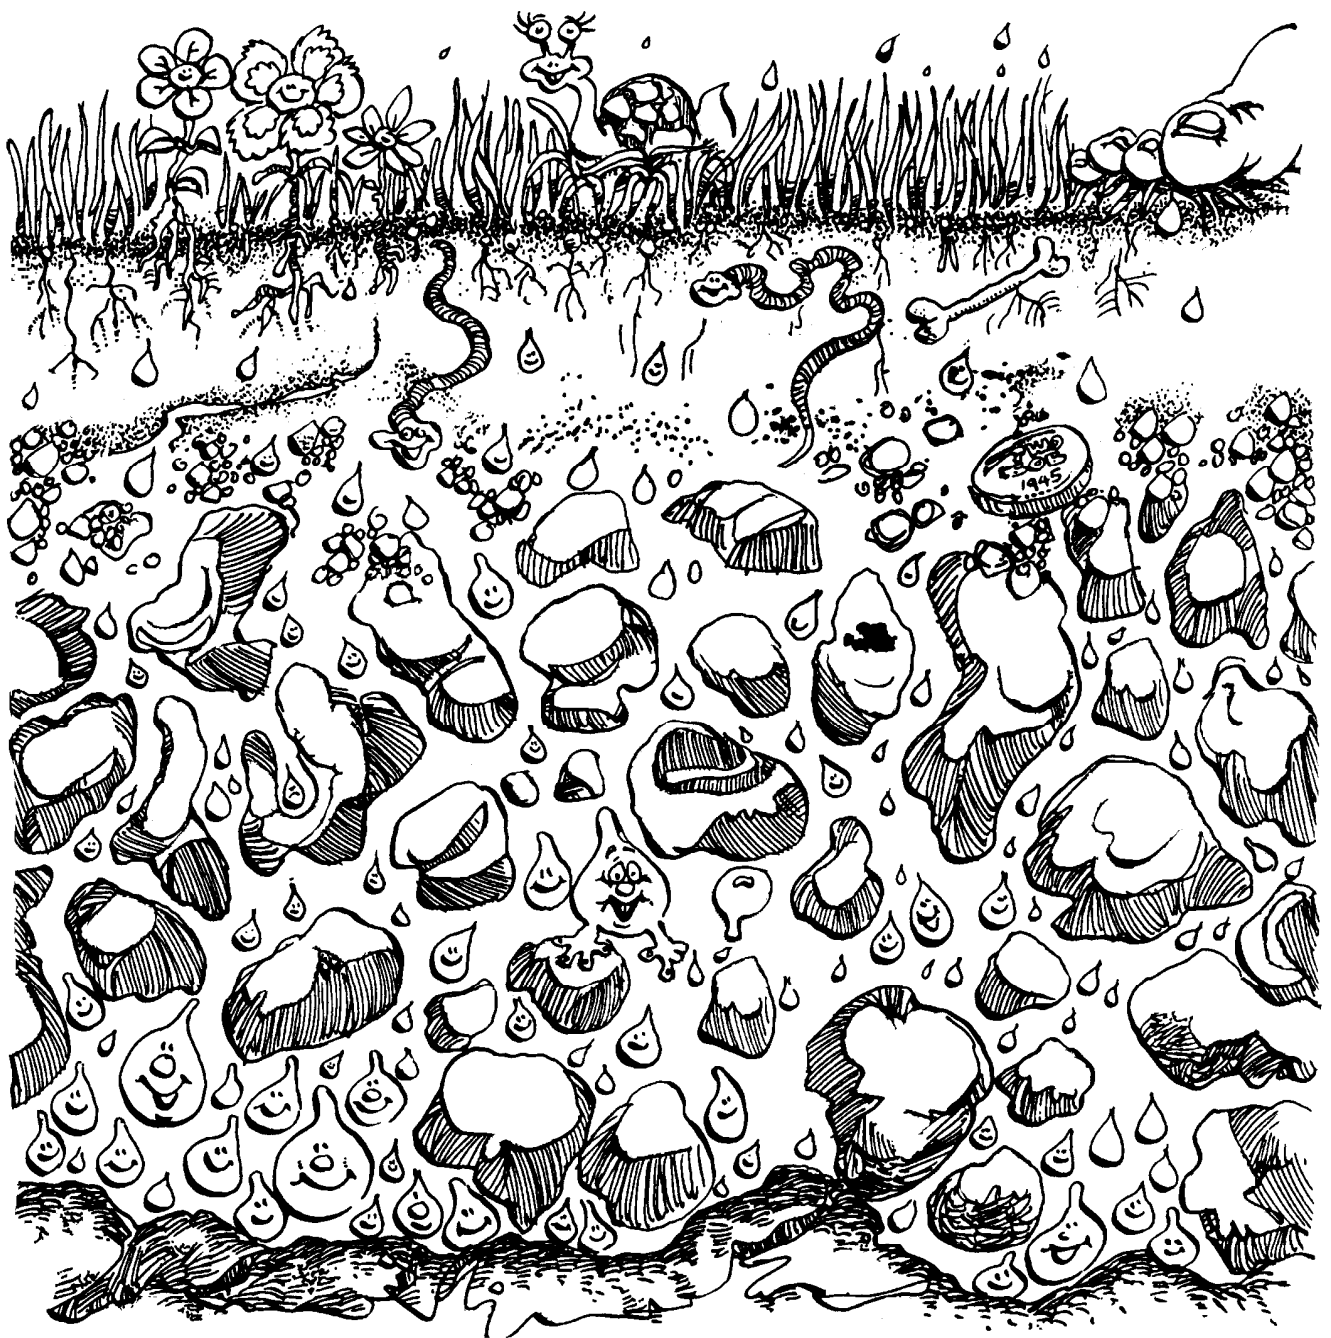

Whizzy began falling DOWN,
DOWN, DOWN...

.... it started to rain. **DOWN,**
DOWN DOWN they went...

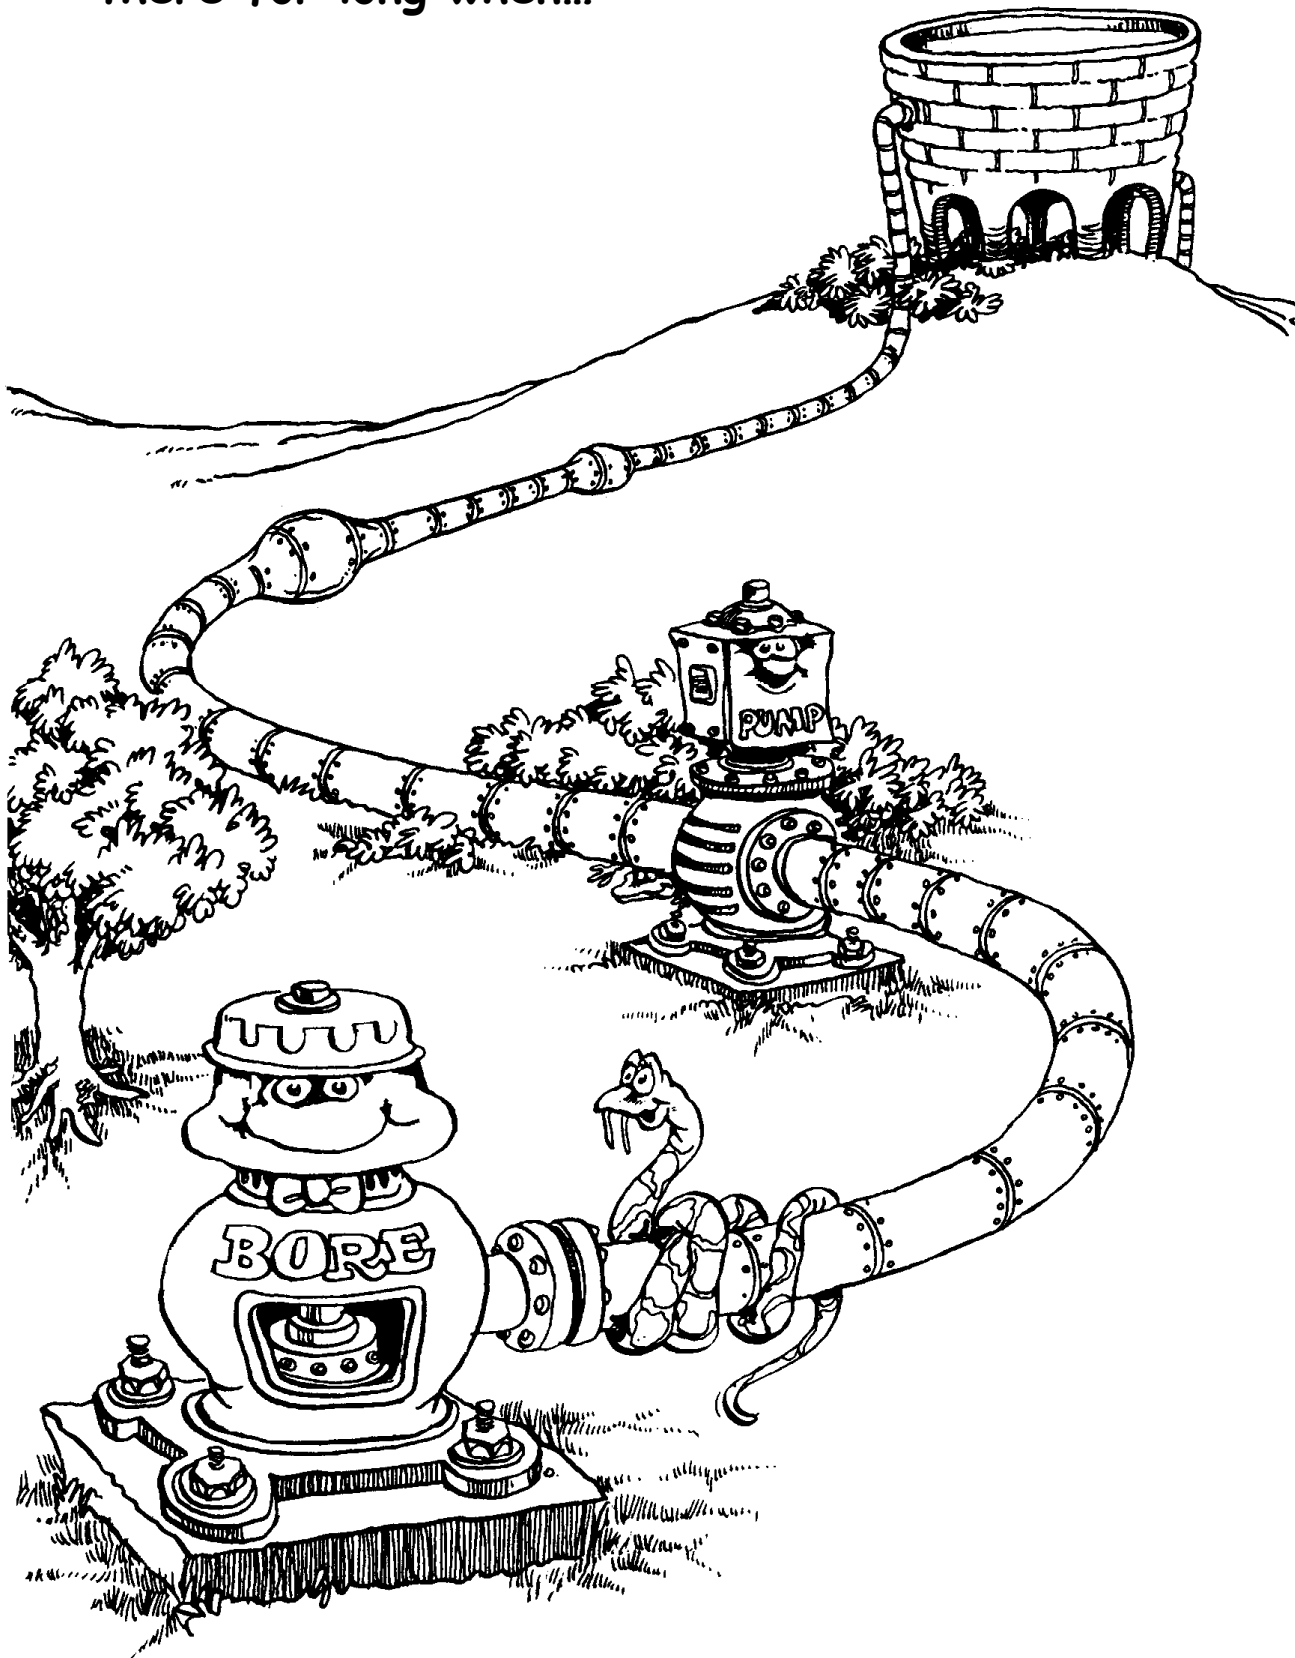

... kerplop right in the grass. From here they slowly oozed **DOWN, DOWN, DOWN** through the soil, until at last they reached a layer of rock that they couldn't get through.

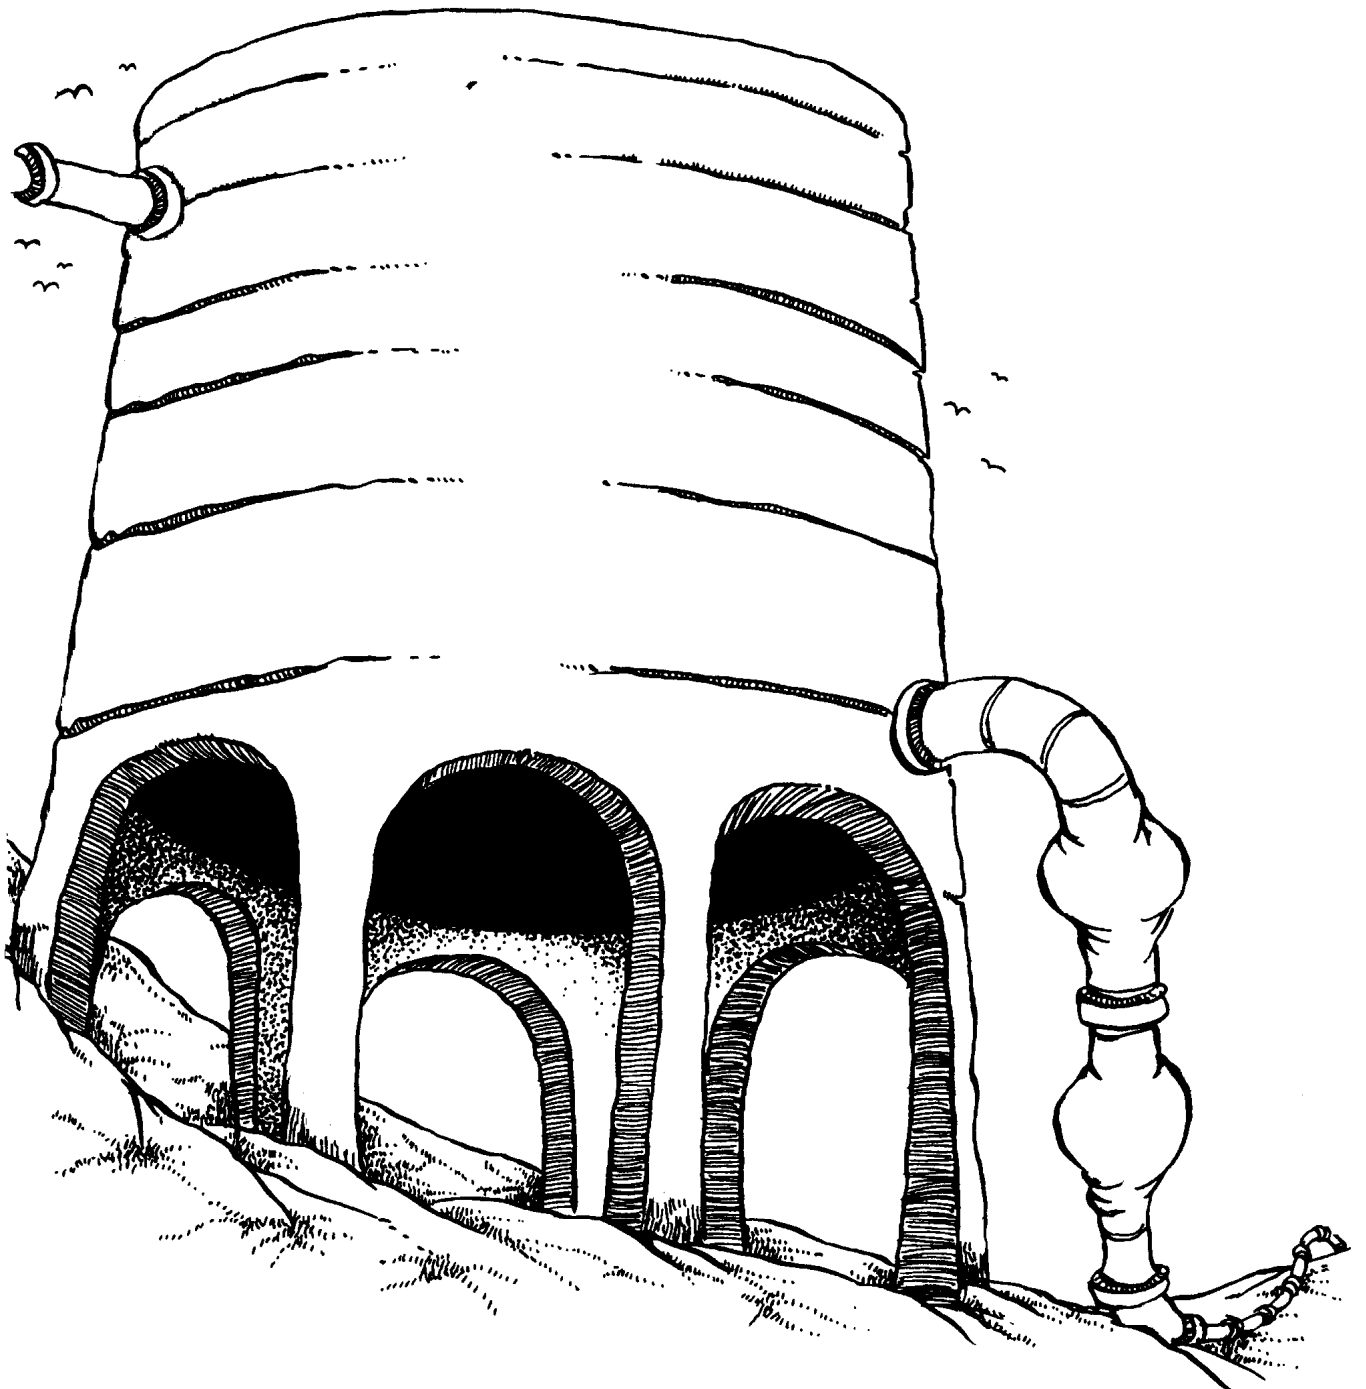

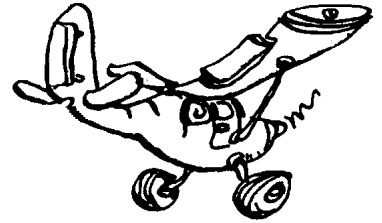

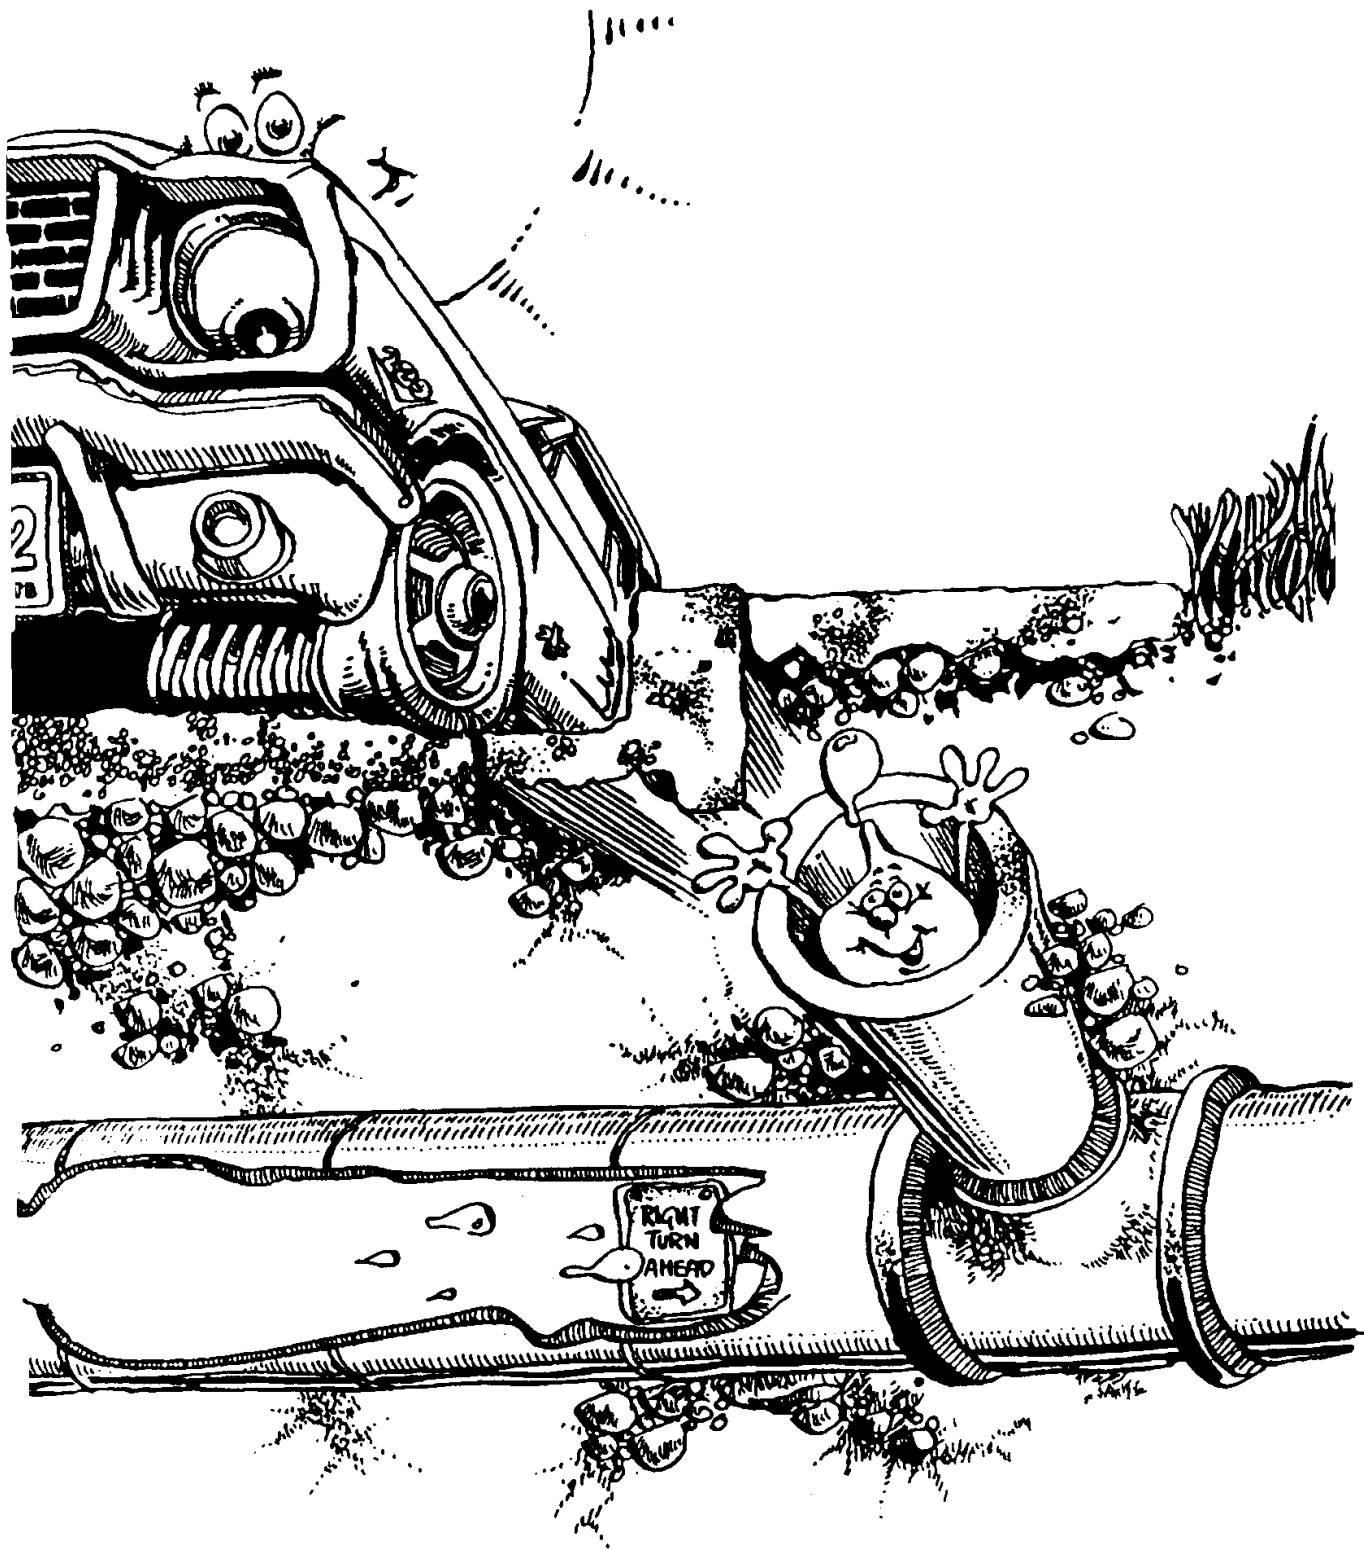

Next they were pumped out of the ground...

... through a bore pipe and UP,
UP, UP into a great big water
storage tank. They weren't
there for long when...

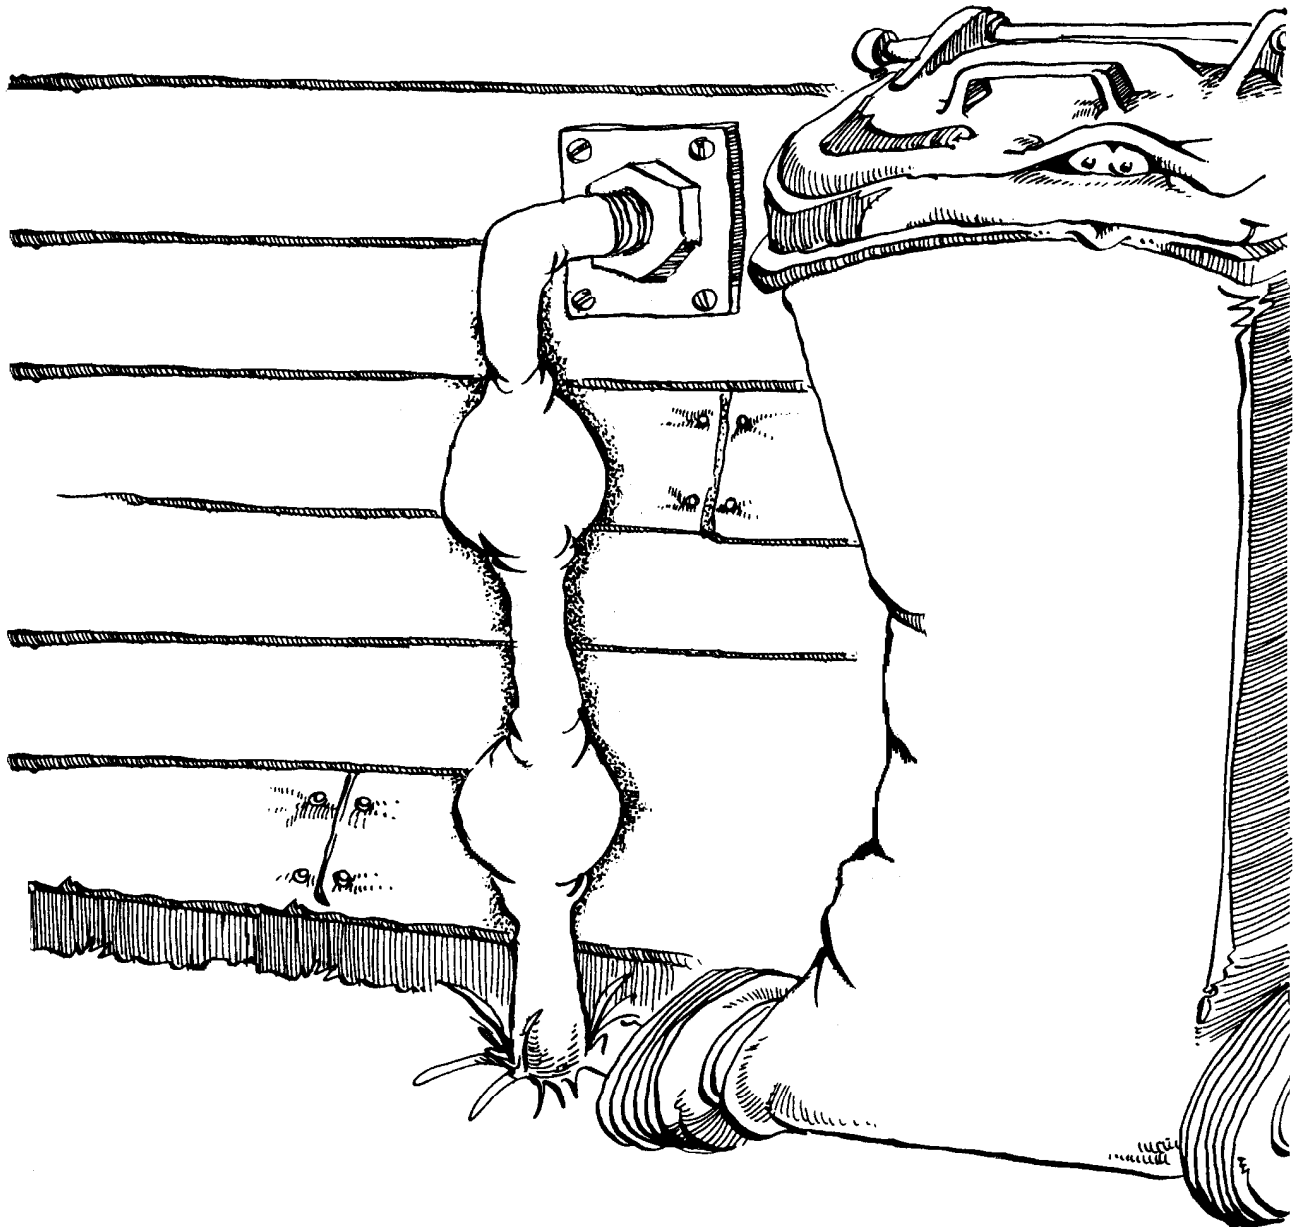

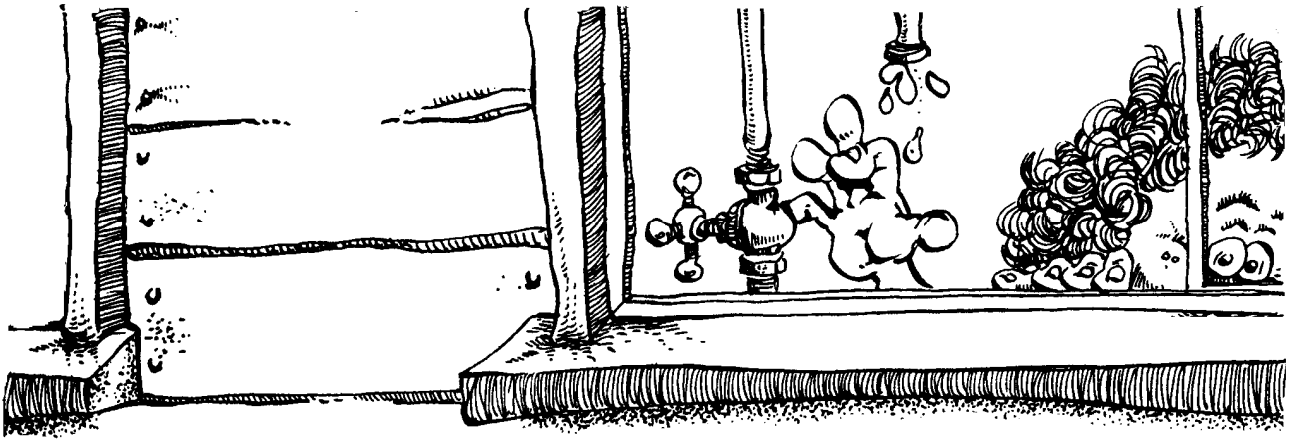

... they were sucked out of the tank
and into a LONG, LONG, LONG pipe.

From this pipe, they flowed into one of the water mains which was buried under the streets, then they were taken into a smaller pipe...

... up the side of a building...

... and out of a tap.
