

Explosives discovered after emergencies and disasters

www.rshq.qld.gov.au

Small arms ammunition

Detonators

Fireworks

Marine flares

Blasting explosives

Propellant powders

If you are undertaking clean-up and recovery operations after an emergency or disaster, you may come across explosives such as:

- small arms ammunition
- detonators
- fireworks
- marine flares
- blasting explosives
- propellant powders.

Do not touch these!

All explosives are dangerous and can cause serious injury and death if not handled properly.

They should only be handled by qualified people.

To organise the pick-up and disposal of these explosives, please report promptly to the nearest police or one of our regional offices listed below.
